

INTEGRITY Collaboration and Communication Tools

Innovative, Easy-to-Use Applications

Summary

INTEGRITY's Collaboration and Communication Tools enable teachers and students to communicate safely with peers. The system offers:

- ✓ E-mail
- ✓ Web Hosting
- ✓ Online File Storage
- ✓ Teacher's Web Page
- ✓ Shared Calendar
- ✓ Message Boards
- ✓ PDA Compatibility

INTEGRITY's Collaboration and Communication Tools offer effective, flexible, scalable, and cost conscious solutions to K-12 schools and are eligible for E-rate.

These services are fully manageable by a school administrator and are customizable to represent your individual school or district.

Communicate and Collaborate

INTEGRITY's e-mail system is an award-winning, managed solution designed to provide the K-12 community with the latest technology and features with little or no involvement from district technology staff. This feature rich system does not require local servers, software or special licensing and is designed for ease of use.

Key Features of INTEGRITY's Managed Communication System

- Local administration and control

- Vacation messages
- E-mail forwards
- E-mail aliases
- Contacts
- Outlook connector
- Easy administration
- Multilingual spell checker
- Online file storage
- Advanced mail filtering
- E-rate eligible

Collaboration

INTEGRITY makes collaboration easy by adopting a unified approach: virtually every kind of information can be **shared**. For example, you can share a file folder with your curriculum group, or share a message board with your team. It is an easy way to keep everyone updated, and to enable online discussions regarding a project.

In the same way, you can setup and share a project calendar, so that everyone is aware of the dates, schedule, and meeting times.

Homework Posting

INTEGRITY's Communication Tool lets teachers post daily homework and share information on the Web.

Message Board

Users can post messages for others to see and reply to. Whether you need to build a knowledge repository or participate in an on-going discussion, INTEGRITY's message board is the preferred way to communicate.

Online File Storage

INTEGRITY Online lets you store all your documents in an account. In this way you can access them from any location and share them with other users.

Being able to access your files from any location means that you don't need to carry disks with you wherever you go, and you don't need to copy all your documents to your PDA in advance. You access what you need directly when you need it.

Web Hosting

INTEGRITY's Web hosting is a managed solution for your school or district. By using an off-site Web host you eliminate the need to worry about software updates and server maintenance. Our high-speed raid servers and redundant data and power sources ensure your web site and e-mail are always available. Features include:

- Technical support
- Stability
- No licensing
- No maintenance
- E-Rate eligible
- Dedicated servers
- MySQL databases
- Multiple domains and subdomains
- Supports PHP, CGI

INTEGRITY's Collaboration and Communication Tools are fully supported by an expert staff with a blend of educational, managerial, and technological experiences. Our talented and dedicated staff will guide you through the implementation process and assure your success by being available to support your specific needs.

Most INTEGRITY Collaboration and Communication Tools can be accessed by mobile devices.

About CELT

Working with the vision, mission, and goals of educational organizations, CELT, a leading systems integration provider, assists with the implementation of technology in support of contemporary educational reform initiatives.

CELT is one of the most comprehensive providers of research/planning programs, systems integration services, and customized decision support solutions. CELT's goal is to provide services of the highest quality, with a focus on student achievement, in the most timely, efficient and cost-effective ways possible using the latest information technology architecture.

INTEGRITY by CELT furthers this goal by providing affordable, reliable and robust services that schools need for communication, collaboration, and data security.
