

MANAGED SECURITY SOLUTIONS

All-in-one Security Solution

Summary

INTEGRITY all-in-one award-winning security solution integrates multiple security applications into an all-in-one solution that is easy to install and manage.

In our effort to provide a best in class solution at an affordable price, we partnered with Astaro Internet Security, a firm with headquarters in Burlington, Massachusetts. *Named Best Business Security Solution of the Year and Editor's Choice by PC Magazine and Best Firewall by Linux Enterprise Reader's Choice*, Astaro is a complete network security solution which provides more power, features, quality, versatility, portability and performance than any firewall in its class.

Key Benefits of INTEGRITY all-in-one Managed Security Solution:

- Best of Breed - Proven Technology
- Monitored and Managed by security expert
- E-Rate Eligible
- Affordable and Scalable

Firewall – The First Line of Defense

The Astaro firewall manages inbound and outbound communications traffic. Our software solution can be installed on standard PC hardware or available as a hardware solution and placed at the point where the Internet enters your facility, controlling network traffic for security purposes.

A user-friendly point-and-click interface allows administrators to block or allow access for each protocol, to each internal network, server, service, and user group. The firewall inspects both networking information (packet headers) and application information (payloads) to detect and block suspicious traffic.

Astaro Security Linux 5

Features

All-in-one solution provides ultimate protection through seven critical security applications.

Firewall – with stateful packet inspection & application-level proxies to guard Internet communications traffic in and out of your school

VPN Gateway – to assure secure communications with “remote offices or home”

Intrusion Protection – to detect and stop hostile probes and application-based attacks

Anti-Virus – to defend computers from both e-mail-borne and web-borne viruses

Spam Filtering – to eliminate the productivity drain of opening and deleting unsolicited emails

Surf Protection – to improve productivity by blocking inappropriate activities beyond CIPA requirements

Spyware Filtering – to eliminate spying and manage bandwidth. No need to spend money on spyware software

Top Rating SC Magazine

- "Astaro Security Linux is an absolute gem"
- "An astonishing rich set of security features"
- "Recommended"

| SC MAGAZINE RATING | |

| Value for money | ★★★★★ |
| OVERALL RATING | ★★★★★ |

SC Magazine gives Astaro five-star ratings.

Hardware Solution

These security appliances provide complete, cost-effective protection against a wide range of information security threats. It is fully integrated in one easy-to manage package. Astaro's technology protects against over 2,000 intrusions, 100,000 viruses, thousands of spammers and 20 million questionable websites – the broadest range of protection available in one product. The security appliance comes with monitoring and support as well as optional content filtering and e-mail filtering.

Hardware Recommendations

- Pentium II or compatible CPU
- 8 GB IDE or SCSI hard disk drive
- Bootable CD-Rom drive
- PCI Ethernet network cards (up to 20 NICs, up to 4,000 virtual LANs)

Software Solution

Our security solution is available as software for installation on standard computers, or pre-installed on security appliances.

Our affordable software solution is scalable and does not require expensive hardware.

E-Rate Eligible!

Complete network security ensures safe Internet learning. Our managed firewall solution is E-Rate eligible as priority one for Internet service. Since our firewall is provided as a service and is necessary to ensure continued operation of your network it is eligible for discount under the E-Rate program, a federally funded program to discount telecommunications, Internet and networking for schools and libraries. With the exception of content filtering (optional), our firewall is also E-Rate eligible under internal connections if purchased up-front.

CELT Corporation Solutions

CELT Corporation is an information technology architect and information systems integrator for learning organizations throughout North America. Working with the vision, mission, and goals of learning organizations, we assist districts with the implementation of technology in support of contemporary educational reform initiatives. CELT develops and designs web-enabled relational database management software applications, seamless network/communications systems, and comprehensive systems integration projects.
