

INTEGRITY™ ONLINE REMOTE BACKUP

Storage, Backup, and Recovery

Summary

INTEGRITY online remote backup service allows you to backup your valuable data such as your student information system, administrative applications or content over the Internet on a daily basis.

INTEGRITY Online Remote Backup automates the process of backing up your data offsite. Gone are manual tape backup, physical rotation of tapes, and the unsecured storage facility. No more guessing about the validity and integrity of your backup. Backups begin automatically and your data is sent to and stored in two redundant storage facilities located hundreds of miles apart. Your data is encrypted and always remains encrypted using a unique 256 bit encryption key that only you have. Moreover, you can restore your files as often as you need to, at any time, day or night, with just a few clicks of your mouse.

Continuity Planning and Disaster Recovery

Creating a school continuity plan is not an easy task to undertake. Although school services are interconnected by a common goal to provide a safe and rich learning environment for teachers and students, they are mostly run independently from each other. How do you assure that your continuity and disaster recovery plan meet your actual needs?

INTEGRITY Services by CELT includes a comprehensive Continuity Planning and Disaster Recovery workshop to help you identify key elements for your planning and recovering effort. Our team will provide you with guidance, along with templates and checklists to help develop and implement your customized plan.

Secure, Retrievable Data

You could have the most powerful and most secure backup method around, but it is useless if you can't get your files back easily when you need them. That's why we've made restoring files with INTEGRITY Online Remote Backup service as easy as possible. In fact, you can start restoring your files in seconds with just a few clicks of your mouse.

Restore files when you want, as often as you want. You have the ability to retrieve individual files, revisions of files, entire folders, or backup sets. Or you can recover all of your data files in the event you experience a complete system failure or data loss. We've even built into INTEGRITY Online Remote Backup service a search feature that allows you to search the filenames and file paths of the files you have backed up.

Key Features of INTEGRITY Online Remote Backup

- Automatic Backup
- Restore Files Anytime
- Economical
- Planning and Assessment Support

Solutions

INTEGRITY online remote backup service is a budget conscious solution designed to provide you peace of mind and free your time.

Your backup will be done everyday, stored in a safe environment, and will be available to you anytime.

Enterprise Plan:

- Up to 250Gig Remote Backup
- Up to 100 servers/computers
- Workshop for 4
- CPDR kit
- On-site planning
- \$4/Gig/month

District Plan:

- Up to 100Gig Remote Backup
- Up to 50 servers/computers
- Workshop for 2
- CPDR kit
- \$5/Gig/month

School Plan:

- Up to 50 Gig Remote Backup
- Up to 10 servers/computers
- Workshop for 2
- CPDR Kit
- \$6/Gig/month

Server plan:

- Up to 10 Gig Remote Backup
- 1 server/computer
- Discounted workshop and planning kit
- \$10/Gig/month

Features

- **Security and Encryption** - your data is always safe. Your files are encrypted using state-of-the-art, 256 bit AES encryption and stored in redundant, secure data centers located hundreds of miles apart from each other.
- **Compression** - uses maximum compression technology to ensure that both your bandwidth and storage usage are minimized.
- **Backup Sets** – easy backup setup. Choose what to backup by folders or by file types.
- **Unlimited Revisions** - store an unlimited number of versions of the same file. With advanced revision rules, managing your revisions is easy.
- **Restore Files 24/7** - restore any files for administrators and teachers anytime.
- **Logs and Reports** - let you know what was backed up, when it was backed up, and how much storage space you are using. If you want even more assurances, you have the option to receive automated e-mail notifications on every successful backup.
- **Multiple Computers** – backup multiple servers and/or computers.
- **Support for Microsoft Exchange and SQL Servers**
- **Support** - premier support by our team of expert.
- **Planning Workshop** - most service includes Continuity Planning and Disaster Recovery workshop.
- **Continuity Planning Disaster Recovery Kit** – easy-to-use implementation kit for a well prepared continuity plan.

CELT Corporation Solutions

CELT Corporation is an information technology architect and information systems integrator for learning organizations throughout North America. Working with the vision, mission, and goals of learning organizations, we assist districts with the implementation of technology in support of contemporary educational reform initiatives. CELT develops and designs web-enabled relational database management software applications, seamless network/communications systems, and comprehensive systems integration projects.
